Nigeria can become global gas giant, says NLNG

The Managing Director and Chief Executive Officer of Nigeria Liquefied Natural Gas Limited (NLNG), Tony Attah, said Nigeria can be a top gas producing country, with a potential to increase its LNG market share. He spoke during the public presentation of the company's facts and figures in Lagos. For that transformation to be, Attah said the right business environment needed to exist. He referred to the proposed amendment of the NLNG Act by the National Assembly, which he said, would jeopardise the aspirations of making Nigeria global gas leader. He said: "The Nigeria LNG Limited (NLNG) Fiscal Incentives Guarantees and Assurances Act (NLNG Act) allowed investments to flow into the country. It provided investors the confidence that any agreement entered into would be respected and preserved. To amend the Act will not help Nigeria in developing its vast gas resources, NLNG and its hopes for expansion. It will erode investors 'confidence that the Act provided in the first place."
